

Please replace the abstract on page 15 with the following abstract:

A method and apparatus for reducing soft errors ~~is disclosed. In some~~
~~embodiments the method comprises~~ in which the method includes: assigning a plurality
of nodes within a storage circuit to a predetermined state; evaluating a plurality of signals
coupled to the storage circuit, where evaluating the plurality of signals enables a first
node to change from its predetermined state ~~and enables a second node to be more~~
~~susceptible to perturbations~~; and actively maintaining ~~the~~ a second node in its
predetermined state ~~for a predetermined period of time~~, where actively maintaining the
predetermined state reduces the storage circuit's susceptibility to soft errors.
